

HPC CLUB

HIGH PERFORMANCE COMPUTING CLUB

Mississippi HPC Conference 2024

Goals of the HPC Club

- The primary goal of the HPC Club is to foster interest in High Performance and Parallel computing among all majors at MSU.
- The HPC Club also serves to provide opportunities for students to participate in the HPC community.
- Finally, the HPC Club provides basic training on skills needed in the HPC community.

Prometheus

Prometheus is a Raspberry Pi cluster built by the HPC Club as an inexpensive learning model.

Total Compute

32 Cores, 32 GB RAM,
500 GB Parallel Storage,
50 GB Shared Storage

- Head Node
 - Raspberry Pi 4 B
 - Quad core Cortex-A72
 - 4 GB RAM
 - 120 GB SSD
- 8 Compute Nodes
 - Raspberry Pi 4 B
 - Quad core Cortex-A72
 - 4 GB RAM
- 4 Storage Nodes
 - Raspberry Pi 4 B
 - Quad core Cortex-A72
 - 4 GB RAM
 - 250 GB SSD
 - Replicated GlusterFS

PI HPC

PI HPC is intended on providing a guide on how to setup a Raspberry Pi cluster and a repository of resources for configuration and demonstration for this cluster.

It is a jumping-off point where students and instructors can further explore cluster computing at their own pace.
